ADVISORY

The Indian Council of Medical Research (ICMR) has launched the **“Medical Innovations Patent Mitra”** initiative to strengthen India's biomedical innovation ecosystem by supporting patent protection and technology transfer of healthcare innovations emerging from institutions across the country.

2. The initiative offers fully government-funded support for patent filing and technology transfer, enabling researchers and innovators to protect their intellectual property and facilitate the translation of research outcomes into healthcare products and technologies for public benefit. It is aligned with the National Medical Commission (NMC) objective of promoting research, innovation, and excellence in medical education.

3. In this regard, all medical colleges and institutions are requested to widely disseminate information about the initiative among faculty members, clinicians, researchers, and students, and to encourage innovators to make use of the platform for patent filing and technology transfer.

4. Active participation by medical colleges and institutions will play an important role in strengthening India's healthcare innovation ecosystem and accelerating the conversion of research into impactful healthcare solutions.

5. Further details are available on the Patent Mitra Portal:

<https://patentmitra.icmr.org.in>;

6. For any queries, medical colleges / institutions may contact ICMR at patentmitra.hq@icmr.gov.in.
