Medical Assessment & Rating Board (MARB)

No.21724/Legal/2023/022813

Date: 28.04.2023

To
All the Department of Medical Education of the States and UT

Sir/Madam
Sub: Regd transfer of faculty in Government Medical Colleges

It has been brought to the attention of Medical Assessment and Ratings Board, NMC that transfers of faculties are being made in Government Medical College in the state Medical Colleges for the purpose of fulfilling teaching/faculty requirement before the inspection by the Board.

The Board has also noticed that various Writ Petitions are being filed in various High Courts by faculties who have been transferred by the state government from one medical college to another alleging that their transfer will result in deficiency in the first medical college. In view of the above situation, the following points are being reiterated by the Commission:

1. It is responsibility the medical college to ensure that the faculty requirements as laid down in the MSR Regulations for the sanctioned capacity of UG as well as PG course so that the standard of teaching is not compromised.
2. Once a faculty for one academic year has been counted in a medical college, the same faculty cannot be accepted as a faculty of another medical college in the same academic year. A faculty is required to make a declaration to this effect in the declaration form to the commission.
3. The issue of transfer from one govt medical college to another government medical college is concerned it is within the administrative domain of state govt. It is upon the state govt to ensure fulfillment of faculty requirement and transfer from one govt medical college to another if made for the purpose of rectifying deficiency in one medical college should not cause deficiency in another medical college.

You are requested to kindly abide by the above.

This issue with the approval of the competent authority.

Dr. J L Meena
